SUMMARY

Second-year Computer Science student at Misr International University with a growing interest in cybersecurity and network security. Actively building projects in C++, Python, Assembly, and web technologies. Member of IEEE MIU Student Branch and Microsoft Student Partner program. Currently pursuing Red Teaming and Ethical Hacking (Udemy) and CCNA certifications. Looking for a cybersecurity internship to develop practical skills and contribute to a security-focused team.

EDUCATION

Bachelor of Computer Science (In Progress) | Misr International University, Cairo *Sep 2024 – Aug 2028*

- Year 2 coursework: Data Structures, Algorithms, OOP, Computer Networks, Operating Systems
- Active member of IEEE MIU Student Branch and Microsoft Student Partner (MSP) program since Year 1

TECHNICAL SKILLS

Languages: Python, C++, Java, C, Assembly

Web Technologies: HTML, CSS, JavaScript, C#.NET, SQL Server

Security Tools: Nmap, Burp Suite (basic), Cisco Packet Tracer, Wireshark (familiar)

Cybersecurity: Penetration Testing Fundamentals, XSS, CSRF, OWASP Top 10, Network Security, Incident Response Basics

Networking: TCP/IP, Subnetting, Routing, VLANs, CCNA Basics

Concepts: OOP, Data Structures, Algorithm Design, Role-Based Access Control (RBAC)

Soft Skills: Problem Solving, Critical Thinking, Teamwork, Communication, Time Management

PROJECTS

Fingerprint Recognition System | *Assembly · C++ · Private Repository*

- Built individually — register-level data processing and binary logic using Assembly language
- Worked with memory operations and CPU registers; builds understanding of low-level vulnerabilities like buffer overflows

Maze Solver — A* & Dijkstra Algorithms | *C++* → [View on GitHub](#)

- Team project — designed and implemented a graph-based maze-solving system
- Built Dijkstra's and A* with a custom min-heap priority queue; compared algorithmic performance

Solar Panel Ordering & Installation Platform | *HTML · CSS · JS · C#.NET · SQL Server [In Progress] In Progress — Private*

- Full-stack web platform with role-based access control (RBAC) separating Admin and Customer permissions
- Applied input validation and database integration — directly relevant to OWASP web security awareness

Network Topology Lab | *Cisco Packet Tracer [In Progress] In Progress — Private*

- Simulating a multi-device network with routing protocols, subnetting, VLANs, and access control policies

Connect Four Game | *Java* → [View on GitHub](#)

- Team project — OOP design with encapsulation, modular structure, and win-condition detection

Car Dataset Analysis | *Python · Orange · Data Mining* → [View on GitHub](#)

- Applied classification algorithms and data visualisation to extract insights from a vehicle dataset

COURSES & CERTIFICATIONS

- Red Teaming & Ethical Hacking – Udemy [In Progress]

- CCNA: Introduction to Networks – Cisco Networking Academy [In Progress]
- Cybersecurity Fundamentals – MaharaTech ✓
- Computer Network Fundamentals – MaharaTech ✓
- Cybersecurity Foundations – Coursera ✓
- Introduction to Python – IEEE MIU Student Branch ✓
- C Programming Basics – Self-directed ✓

ACTIVITIES & LEADERSHIP

Technical Team Member | IEEE MIU Student Branch *2024 – Present*

- Active in Python and Cybersecurity technical tracks; hands-on workshops covering networking, security tools, and scripting

Technical Member | Microsoft Student Partner (MSP) *2024 – Present*

- Cybersecurity-focused training sessions and cross-functional technical collaboration

LANGUAGES

Arabic: Native | **English:** Fluent — strong written and verbal communication for professional environments
